Know your Mask

Fraudulent N-95 Respirators and health products making misleading claims:

The COVID-19 pandemic has created tremendous pressure for organizations and individuals to obtain PPE. This has caused a rise in fraudulent/uncertified N95 respirators, as well as a range of other health products and novel inventions, that falsely claim to provide protection against COVID-19.

These unapproved products are being sold online and in some stores and may not meet mandated safety and performance measures, therefore placing dental staff at risk.

Mask sterilization and reuse:

Work continues to determine whether N95 masks can be sterilized and reused. In the meantime, before reusing sterilized N95 masks, please monitor [Health Canada's medical device announcements](#).

[Alphabetical listing of NIOSH approved N95 or greater:](#)

How to detect a NIOSHH counterfeit mask:

City of Winnipeg Police is looking for the dental records for:

Mildred Nelson

Dob: 1959/01/10

She also went by

Mildred Flett

Or Norma Mildred Nelson

If this person has been a patient of record please contact:

Andrea Scott #2210

Detective Sergeant

Winnipeg Police Division 41
