

HEAL, Organizations for Health Action needs your feedback!

10-minute survey will help HEAL

The CDAA is a member of HEAL, Organizations for Health Action. This is a coalition of 40 national health organizations in the public and private systems, dedicated to improving the health of Canadians and the quality of care they receive. Working together this coalition is able to advance issues and policies with a unified voice.

We know that Canada is in the midst of a healthcare human resource crisis across the system and this has been identified as a priority among members. HEAL is at the table with the federal government advising on short-, medium-, and long-term solutions. To support these efforts HEAL is launching a national pan-profession healthcare HR survey with a specific focus on steps to improve retention within the sector.

The survey **will take less than 10 minutes** to complete. Responses are anonymous and only analyzed in aggregated form to identify national trends. Findings will help HEAL develop specific recommendations and solutions on how to address the Healthcare HR crisis. We strongly encourage you to join your fellow healthcare professionals in having your voice included and experience represented.
